

ROUND STRUCTURE

- 1 Command Phase:** Gain CMD tokens (number set by your faction). Make an Initiative Check: the winner picks who has Initiative. Each loser gets +1 CMD token.
- 2 Jump Phase:** Take turns. On your turn: Open a Jump Point, Jump In a unit (deploy within 6" of a friendly Jump Point), or Pass (no further turns). Ends when all players have passed.
- 3 Tactical Phase:** Take turns. Drag to Select a battlegroup and activate it, completing each activation step for every unit before the next. Give each unit an Activated token. Ends when all units have activated.
- 4 End Phase:** Check mission scoring. Clear Activated tokens. Discard unused CMD tokens. Begin a new round.

INITIATIVE CHECK

- Each player rolls a number of D6 equal to their faction's Initiative value.
- Each 2 or 3 is one success; each 1 is two successes.
- Most successes wins and chooses who holds Initiative this round. Ties: lowest dice sum wins, then clockwise from the last holder.
- Every player who did not win gains +1 CMD token.

ACTIVATIONS (PER UNIT)

- 1 Movement Step:** Pivot any amount, then move ahead up to the Thrust value.
- 2 Passive Attacks Step:** Suffer Passive Attacks from enemies in range and arc.
- 3 Action Step:** Take one Action.

ACTIONS

- Open Fire:** Attack with all weapon systems. Roll equal to or under Silhouette to hit. Target rolls Shield saves against the dice that hit. Assign unsaved hits to already-damaged ships first.
- Scan:** Scan a single object or ship within 3", or collect any or all Free-floating asset tokens within 3".
- Scramble Squadrons:** Deploy one carried Mass 0 unit wholly within 6". It takes one action, then gets an Activated token.
- Jump Hop:** If all ships in the unit are within 6" of a friendly Jump Point, remove them and set them up within 6" of a friendly Jump Point in another Sector.
- Jump Out:** If all ships are within 6" of a friendly Jump Point, remove them and place them in your Reserves.

- Resupply (Utility Ships):** Select a friendly Mass 1-3 ship. Until the end of the round it counts as +1 Mass for Blockading, up to a maximum of its own Mass.

COMMANDS

- All Hands (1 CMD):** After a friendly unit takes its first action, spend 1 CMD to take a second, different action with it.
- Executive Oversight (1 CMD):** Re-roll one attack die, initiative die, or saving throw.
- Power to Engines (1 CMD):** At the start of a unit's movement step, move twice this step (pivot and move both times).
- Power to Weapons (1 CMD):** Before rolling to attack, subtract 1 from each attack die (minimum 1) for this Salvo. Raises the chance of criticals; does not prevent duds.
- Power to Shields (1 CMD):** Before rolling saves (Shields 1+), add 1 to the unit's Shields value for this Salvo.
- Red Alert (1 CMD):** A friendly ship without an Activated token that would be destroyed is not; it regains 1HP. At the end of its next activation it drops to 0HP (no second Red Alert), unless it jumped out.
- Requisition (1 CMD, Hypergrowth):** On your Jump In turn, form a new unit from Shipyard ships, pay their cost in Credits, and jump them in as if from Reserves.

RULES YOU MIGHT FORGET

- Unit Coherence:** ships stay within 6" of all other ships in their unit.
- Drag to Select:** a lead unit plus unactivated units within 6" of it, Combined Mass 10 or less.
- Squadron Capacity:** a unit carries Squadrons up to twice its Combined Mass.
- Attack Dice Damage:** D6 = 1, D8 = 2, D10 = 3, D12 = 5.
- Arcs:** Primary 45° front; Auxiliary 180° front; Facilities 360° (passive attack all in range).
- Explosion Check:** roll a D6; equal to or under the ship's Silhouette and it explodes, hitting all units within 3" with a D6 attack (1 damage per hit).
- Easy Target:** a unit that moved under 3" and did not Jump; enemies may re-roll attack dice against it.
- Inertial Strain:** if any single pivot is over 90°, the ship cannot make Primary attacks.
- Escort / Blockade:** greatest Combined Mass within 6" (tie-break: most ships within 6").
- Gravity Well:** Jump Points cannot be placed, and units cannot jump, within 9" of a Planetoid.
